

- The Missouri Department of Conservation (MDC) provides forest, fish, and wildlife habitat recommendations to a wide variety of Missouri citizens. In order to provide better service to landowners, MDC has compiled a list of Missouri businesses, groups, or individuals that are willing to install conservation practices for private landowners.
- This list has been compiled as a convenience for landowners who are looking for physical assistance to implement and/or install forest, fish, and wildlife practices on their land. *All fees, charges, and terms will be negotiated between the client and the provider of the service.*
- This list is similar to a phone book's yellow pages, and is called "**Conservation Contractors.**" The list is offered with the understanding that it only represents those who provided information about their services.
- The list is not to be interpreted as an endorsement of the listed providers, or a lack of endorsement of any provider not included. Landowners will always be encouraged to check locally for the names of individuals, groups, or businesses that may not appear on this list.
- Public land managers for the Missouri Department of Conservation may also use this list to locate individuals interested in performing contract work on Department lands.

You (or your business) are invited to complete the enclosed application and return it to the address listed at the bottom of page 4. Your information will be included in future updates of "**Conservation Contractors.**" Only completed applications will be accepted. Please check ONLY those activities you have experience with. In the future, the Department plans to provide habitat management workshops to interested contractors and would welcome your participation to enhance or broaden your skills.

Annual revisions to the list are planned to keep the list up-to-date. Please notify us of any changes to your information.
